Company
Example Metal Parts Ltd. (fictional)

Site / department
Stamping shop, press line 3

Date and time of incident
14 September 2026, 10:40

Employee
[withheld] Job title: press setup technician

What was the employee doing just before the incident?
Changing the die on a 150-ton mechanical power press and adjusting the stock feed.

What happened?
The technician switched off the light curtain with the key switch to reach the feed rollers while the press was still in single-stroke mode. He pressed the foot pedal by mistake and the ram came down on his left hand. The tips of his index and middle fingers were partially amputated.

What was the injury?
Partial amputation of two fingertips

Part of body affected
Left hand, index and middle fingers

Object or substance that harmed the employee
Mechanical power press, ram and die

Treatment
Taken to the emergency room and admitted to hospital overnight

Reported by
[withheld], EHS coordinator
